

Qtenboard Nano Smart Whiteboard adopts built-in AI to assist daily teaching efficiently. It provides full subject toolkits and supports real-time annotation on all software interfaces. Featuring sensitive capacitive touch, it delivers smooth and precise operation. The gap-free design enables seamless screen and blackboard transition with full-screen writing. Rich teaching resources help teachers create vivid, interactive and high-quality classrooms effortlessly

Dedicated Subject Functions

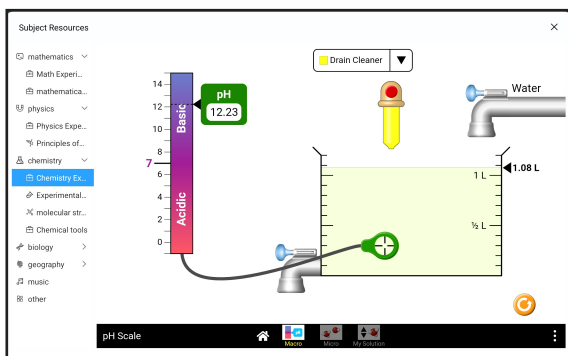

Mathematics

Math module sync-renders dynamic graphs updating instantly with input numeric values

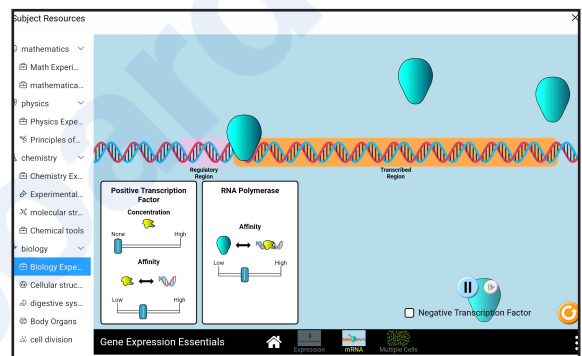

Physics

Physics module features 2D visuals strictly obeying natural physical laws in real daily scenes

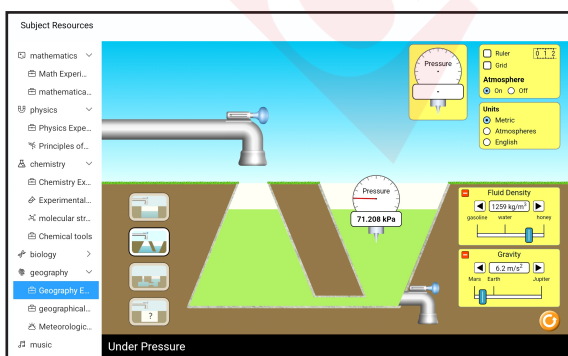

Chemistry

Chemistry module is 2D simulations visualize authentic chemical reaction flows for learning

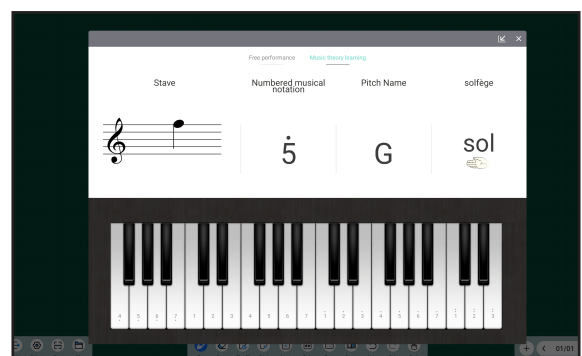

Biology

Biology module creates dynamic cell visuals with accurate internal cross-section structures

Geography

Geography module offers 2D earth maps and lively animations showing natural water flow across landscapes

Other

Subject modules offer vivid visuals spanning diverse fields for simple fast efficient knowledge absorption now
